Additional Representations

A letter from the Agent has been submitted. In summary, the letter states that the indicative Environment Agency maps are inaccurate and the site and access actually lie within flood zone 1, the lowest risk of flooding, so there is no requirement for a Sequential Test to be undertaken. Therefore, the letter states, there is no justifiable reason for the first refusal reason. If members would like Officers to respond to the letter, then a verbal response can be given during the committee meeting.
